

CHIRAG DESKTOPS

Save Energy Maximise Performance

As graphics cards and processors become increasingly powerful, the costs of running a desktop computer are rising rapidly. Today's computer drains more electricity than ever. When building a system, it's important to consider not just the energy it uses, but the efficiency with which it runs. Conserving energy is important for us at CHIRAG, and that's why many of our products now meet Energy Star 5.0 Specification, the highest independently certified standard in energy efficiency.

You might think that comes at the cost of with Chirag NuEdge Series be further from the truth. efficiency, Chirag NuEdge maximum power with no performance.

energy efficiency reduced power, but Products, that couldn't Despite their incredible Series Systems provide reduction in excellent

ENERGY STAR® qualified help you save money and emissions by meeting guidelines set by the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Energy. You can help reduce electricity usage and its environmental impact by power products and practices reduce greenhouse gas strict energy efficiency

managing or turning off your product when it is not in use for extended periods of time, particularly at night and on weekends.

What are the potential benefits of the new Energy Star® specification? Desktops, Notebooks, and Workstations manufactured after July 1, 2009 that displays the ENERGY STAR® label meet the more stringent 5.0 requirements. Because of these requirements, your computer has a highly efficient power supply and other hardware specific features that, based on EPA estimates, could annually:

- Save you up to 130 kWh of electricity. Prevent up to 200 lbs of green house gas emissions (enough to fill a large room). Moreover, Energy Star compliant computers can save even more energy by using ENERGY STAR® power management features, which allow the computer to enter a very low power mode when not in use for a specified period of time. The EPA estimates that these power management features, when enabled on ENERGY STAR® qualified computers, could save you up to 500kWh of electricity annually. This is equivalent to: Saving greenhouse gas emissions by taking your car off the road for 3 weeks.

A Green Dream for Everybody

All of us want to save the planet, and you can start your dream by using the CHIRAG PC. We are committed to improving our lives through technology. The planet is something we should all care about. It is, after all, the only one we have got. Whether you are saving on power or fuel, or nurturing and planting trees, going green will benefit you in every measurable ways. You will save money, live healthier and even be happier. It is not just about changing what you do, but also what you buy.

Technology empowers one with fascinating possibilities. But it is up to you to use technology right and to its full potential. It can work wonders or become a major cause for concern.

Get a CHIRAG PC is a perfect fit for your business environment, designed for the way you work and fulfils your future needs. This PC is ready and equipped to help you make the most of your new PC.

With innovative engineering, high Mean Time Between Failure, product excellence through latest technology and a lot of quality testing, you know you're getting a reliable and durable desktop that can go the distance. Chirag offers service and support options, so you can spend your time focusing most importantly on your business.
